

INSTRUCTIONS FOR CYCLODIODE LASER PATIENTS - DR WENG NG

Eye Drops

- After surgery, you can remove the dressing by yourself the next morning.
- Then use **Prednefrin Forte** eye drop every two (2) hours and **Atropine 1%** twice a day until I see you again in one (1) week.

Tablets

- Take two (2) **Panadol** tablets four (4) times a day in the first three (3) days.
- If that does not provide adequate pain relief, take **Nurofen** 200mg three (3) times a day (if you don't have a history of stomach ulcer, asthma or kidney disease).

Activity

You can resume normal activity the next day.

Please contact me on my mobile 0402 757 296 or Brisbane Eye Clinic 3832 1700 if any of the following occurs after surgery;

1. Eye pain not relieved by the above medications
2. Vision becomes worse compared to the first day after surgery
3. Any other significant concern regarding your eye that had surgery
